DFMC Newsletter June 2020

REGULAR MEDICAL NEEDS DO NOT STOP DURING THE PANDEMIC

The Chief Medical Officer of Australia, Professor Brendan Murphy, last week at a press conference, made it very clear not to ignore your ongoing health conditions and consult your family GP.

Our Medical Centre is a very safe place to visit. It may look a bit different to when you last came but it is a very safe environment.

Although the advice to "stay at home unless you need to go out" still is important, as the restrictions are slowly lifted, it is very important to consult your local GP for advice, especially for people with chronic health conditions (such as diabetes, asthma, heart conditions or for examinations such as skin checks for potential skin cancers). Telehealth is a wonderful temporary measure but face to face consultations are needed in many cases. We are practising strict hygiene and social distancing measures and diverting any potential covid-19 cases.

To make an appointment you can ring 9795 6422 between 8.30am and 5.00pm Monday to Friday or you can book an appointment online.
